Subject: Revised FS Discussions Action Item - Constructability Review Technology Assignments

Kristine – Please find attached a memo on constructability review of the technology assignments process. This action item was identified in the April 24, 2014 meeting and was captured in the action items list as:

4. LWG provide an assessment of “constructability step” of the technology evaluation (i.e., what are the common themes or rules that LWG would suggest for this).

This information is being provided to EPA in preparation for the June 5 and June 10 technical discussions on technology assignments. The memo presents some specific examples of key issues in order to facilitate those discussions, but is not a comprehensive list of LWG concerns. Please let us know if you have any questions.

Thanks.

Carl
